

ALLERGY ASTHMA ASSOCIATES

Mark Lazarovich MD
Peyton Wingfield FNP

Immunotherapy Transfer Policy

Thank you for choosing our office for your patients' immunotherapy care. To ensure safe and seamless continuation of treatment, we require the following **prior to the patient's first scheduled injection appointment**:

1. **Complete injection records** – All previous immunotherapy administration records must be sent to our office.
2. **Last office visit notes** – Documentation of the patient's most recent allergist visit must be included.
3. **Allergy vials** – Vials must be shipped directly to our office or brought in by the patient on the day of the appointment.

Please note:

We are unable to administer injections if these materials are not received in advance.

Patients who arrive without the required documentation or vials will be rescheduled, and no injection will be given at that visit.

We appreciate your cooperation in helping us provide safe and effective care.
